

ACES is delighted to present this seminar

***Land use in the coming decades:
Science, economics, and policy***

Uwe Schneider

**Institute of Sustainability and Global Change
Dep. of Geosciences and Economics
University of Hamburg, Germany**

15 October 2009

11.00-12.00h

King's College

(KCG8 – Old Aberdeen)

University of Aberdeen

Uwe A. Schneider is an agricultural and resource economist with a strong background in agricultural science. His research interests relate to land use externalities regarding climate, water, soils, and nature reserves; impacts of land scarcity on food, biomass, timber, and species protection potentials; and market and welfare effects of environmental policies related to land use as well as the marine environment.

PLEASE COME ALONG AND ENJOY THIS INTERDISCIPLINARY EVENT

Organised by the Aberdeen Centre for Environmental Sustainability
